DELIBERATELY NOT MENTIONED

Card payment. The feature is built and tested in the app, but the backend cannot yet reach Worldpay — it returns an order with no payment page — so card is shown as “coming soon” and every order goes through as cash. Advertising it now would earn one-star reviews. When the backend is connected, add this line (73 characters, within the remaining allowance):

Pay by card in the app, or with cash when you collect.
